

# Lemantic Life Sciences Hackathon 2024

Predicting PPI on imbalanced data

2024-04

# Proteins

## Definition

# Proteins

## Function

structure

collagen

function

antibodies

regulation

adrenalin

# Proteins

## Antibodies

# Task

## Binary interaction prediction

# Task

Two datasets

experiment (HCoV-HKU1)

literature (SARS-CoV1)

more negative data

more positive data

# Task

## Some directions

- language model embeddings: ESM-2, ProteinBERT, ProtTrans, ...
- adding negative samples to the literature dataset
- methods for handling class imbalance

always make sure that the results are not just obtained by chance  
(easy check: shuffle the predictions and see if the score drops)
